

Georgia Kakourou is a clinical PGD scientist at Choremio Research Laboratory of the University of Athens, at “Aghia Sophia” Children’s Hospital, Athens, Greece since 2009. She obtained her BSc in Biomedical Sciences from the University of Westminster, UK and her MSc and PhD in human genetics from University College London, UK. Between 2002-2009 she worked at the UCL Centre for PGD undertaking PGD for monogenic disorders. She has been actively involved in several studies and activities of ESHRE specialized groups. Since 2013 she was elected a member of the scientific co-ordinating committee of ESHRE Special Interest Group of Reproductive Genetics, where she currently continues to serve as a senior deputy. She is involved in teaching and PhD student technical supervision at the University of Athens and serves as a reviewer for several journals in the field of reproductive genetics.
